

INSTALLATION INSTRUCTIONS

102022 CCCI Test Adapter – Early Magnavox CCCI Module

For use with Caspers 102020 Ignition Tester/Simulator

Use this adapter when testing the coils on the early 1984-1985 "Magnavox" style CCCI system, with four mounting studs, as shown here:

Since the CCCI Simulator is designed to test the 1986 thru 1989 turbo CCCI coil packs, you will need this adapter to change the gender and positions of key wiring between the different years. The adapter attaches between the CCCI Simulator and the coil module.
