

NEW PRODUCT RELEASE

RESTORATION PARTS

OEM Plastic Oval Conduit Clips – OEM Oval Conduit

They're back again! This is the OEM mounting clip that attaches the engine wiring harness to the heater box shroud. By now, all the original clips have failed, and many cars have had big problems with the harness contacting the down-pipe. By replacing this simple to install part (2 are used on your turbo Regal or TTA) and can prevent the dreaded harness fire associated with failure of these clips. The oval conduit should be replaced at the same time, to maintain the restored look of your wiring harness.

Caspers now offers the following parts:

Part Number 103003 Plastic Clip: \$15.95 each

Part Number 103024 KIT: Pair of Clips and Oval Conduit: \$34.95 *best value*

Part Number 103011 Oval Conduit – Turbo Engines: \$12.95
